**1. DETAILED ACTION**

2. Applicant's response filed on 09/28/2006 has been fully considered. Claims 1, 3 and 4 are amended, claim 2 is canceled, and claims 1 and 3-20 are pending. (NOTE: Claims 13-20 are withdrawn from consideration as non-elected invention).

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 1 and 3-12 are rejected under 35 U.S.C. 102(a) as being anticipated by Nishizawa et al. (US 6,551,671 B1).

5. Nishizawa discloses an in-mold label comprising a base layer and a printed mater provided on the base layer, wherein the base layer comprises a core layer, a surface or front layer on the printing side of the base layer, and a back layer on the side opposite the surface layer (Fig. 2). The core layer is equivalent to the claimed substrate. Even though the surface layer is part of the base layer, it is a layer between the core layer and the printed mater, thus it is equivalent to the claimed first down coat layer. The base layer comprises a thermoplastic resin microporous film having a molecular weight of 10,000 to 500,000 (col. 3, line 6). The thermoplastic resin can be poly(ethylene terephthalate) (col. 2, line 63).

Art Unit: 1774

***Response to Arguments***

6. Applicant's arguments with respect to claims 1 and 3-12 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***
